

STEPS

TOWARD A GREENER PACKAGE

With Bemis, you'll access comprehensive technical resources to help develop, test and refine a sustainable packaging solution for your project, then get expert support throughout the go-to-market process. Together, we'll take the steps toward a more sustainable package:

1 UNDERSTAND FUNCTIONAL AND BRAND MERCHANDISING REQUIREMENTS

Our team tests the grease content and moisture gain characteristics of your product, and assesses the physical and aesthetic demands of your package.

2 ENGINEER THE PAPER PACKAGING SOLUTION

Working with you, we recommend—and tailor—materials and formats for your package's unique needs.

3 TEST THE TECHNOLOGY

Your packaging structure and product are tested and proven under extreme heat, humidity and physical strength and performance scenarios.

4 SUBSTANTIATE PACKAGING CLAIMS

We offer guidance on which environmental claims can be made and data certification to support communications to your consumer.

5 COMMERCIALIZE YOUR PACKAGE

You receive full scale-up and field support to ensure optimal graphic reproduction, machinability and performance for your launch.

Paper used to make IntegraGuard® bags
is SFI® certified.
